

Georgia Children's Cabinet

LITERACY RESOURCES

In 2019, the Georgia Children's Cabinet identified reading literacy as one of its four goals to focus on in the next four years. The Children's Cabinet partnered with the Georgia Literacy Coordinating Council to identify initiatives and strategies to meet this goal.

The Literacy Resources document is one of the initiatives the Literacy Council identified as a need to address both summer and "COVID" reading slide. These resources are being distributed through food banks, PTAs, and other means to provide parents a simple list of resources for birth through adult years.
