Georgia Afterschool & Youth Development Standards

A collaboration between GSAN & GUIDE, Inc.

Introduction

Georgia's afterschool and youth development programs provide thousands of youth - from kindergarten to high school - with safe and enriching environments in their time outside of the home and school contexts. High quality afterschool and youth development programs can make important contributions to young people's development and well being. To ensure that Georgia's young people are equipped to thrive and succeed in the multiple domains of their lives, our afterschool and youth development programs must provide environments and experiences that benefit youth by fostering connectedness, well-being, and academic growth.

The Georgia Afterschool & Youth Development (ASYD) Initiative is a collaboration between the Georgia Statewide Afterschool Network (GSAN) and GUIDE, Inc. and is supported by the following state agencies: Georgia Department of Education (GaDOE), Georgia Division of Family and Children Services (DFCS), Georgia Department of Public Health (DPH), Georgia Department of Early Care and Learning (DECAL), and Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD). The development and release of the Georgia ASYD Quality Standards in 2015 was funded by the Governor's Office for Children and Families and was also informed and supported by an array of experts in the fields of education, youth development, public health and juvenile justice.

Georgia's Afterschool and Youth Development Quality Standards are grounded in the widely held and well-established understanding that children, youth, and families benefit when programs increase their capacity to realize their mission by providing high quality programming. Most importantly, the ASYD Quality Standards are informed by research in a variety of disciplines including education, child development and psychology, organizational psychology, business management and public health. The Standards were carefully crafted to ensure that each standard and the supporting indicators are evidence-based, reflect current best practice and correlate with positive intermediary and long-term outcomes in youth. External peer review was provided by Dr. Gabriel Kuperminc, Chair of the Community Psychology Doctoral Program with the Department of Psychology at Georgia State University, Dr. Melissa Landers-Potts with the Department of Human Development and Family Science at the University of Georgia, and Dr. Cynthia Suveg with the Department of Psychology at the University of Georgia.

Rating System

The ASYD Quality Assessment Tool uses the following four-point frequency-based rating scale. The scale is designed to answer the question “how true it is that these statements describe what I observed?”

4 = Very True

The desired practices were observed consistently and/or during all expected situations and times and for all or almost all of the youth present.

3 = Mostly True

The desired practices were observed most of the time and for a good proportion of the youth but not at all expected times or perhaps not for all youth (i.e., there were some missed opportunities).

2 = Somewhat True

The desired practices are observed infrequently or only partially met (i.e., one or some of the indicators are observed but not all of the indicators are present). Or, there is some minor evidence of negative expressions of the behaviors/practices, as indicated by a “1” rating.

1 = Not True

The desired practices were expected, but not observed. Or, the observed practices were a poor approximation of the desired practices, or represented a negative expression of the desired practices, as indicated by the definition of a “1” rating.

N/A = Not Applicable/Don't Know

The observer is not familiar enough with the aspect of the program to rate the performance on this standard or is not sure how to rate it at this time. Or, this standard and/or indicators do not apply to our site or program.

PROGRAMMING & YOUTH DEVELOPMENT

Quality Element 1: Programming & Youth Development

GUIDING PRINCIPLE:

A quality program designs and implements a flexible, well-rounded daily schedule that supports the physical, social, and cognitive development of all youth by providing programming and activities that are well-organized, developmentally appropriate, and offer opportunities to gain new knowledge and skill.
