

BOOST Quality Intake Survey

What New Grantees Can Expect

The BOOST Quality Intake Survey is the comprehensive starting point for understanding your organization's current quality practices, professional learning experience, strengths, and support needs. Your responses help BOOST align your organization with relevant training, technical assistance, assessment opportunities, and other quality supports.

This guide is a preview of the survey experience. The official survey will be completed through the BOOST Grant Portal.

Why is the Quality Intake Survey important?

- Establishes a baseline for your organization's current quality practices and experience.
- Helps identify strengths, areas for growth, and professional learning priorities.
- Informs your BOOST Quality & Training Profile and recommended support pathway.
- Supports portfolio-wide planning for training, technical assistance, coaching, and assessments.

What information will the comprehensive survey collect?

Survey Area	Examples of What You May Be Asked
Organization and Quality Contacts	Organization information and the staff members who will serve as primary and backup Quality Improvement contacts.
Assessment Experience	Quality assessments previously completed, such as the Georgia ASYD Self-Assessment, YPQA, SAPQA, APAS, or other tools.
Professional Learning	Youth Work Methods, ASYD Quality Standards training, conferences, webinars, and other quality-related learning.
Program Practices	Self-reflection across quality areas such as safety, supportive relationships, youth voice, programming, family engagement, staffing, organizational practices, and evaluation.
Strengths and Growth Areas	Your strongest quality areas, areas where additional development may be useful, and examples that provide context.
Quality Improvement Systems	How staff participation in training is supported, barriers to participation, and systems used to sustain continuous improvement.
Support Interests	Preferred learning formats, technical assistance topics, coaching interests, and other quality support needs.

What happens after submission?

1	Review
----------	---------------

BOOST reviews the information submitted and checks the survey for completeness.

2

Quality Profile Development

Survey information is used to identify strengths, growth areas, and recommended supports.

3

Technical Assistance

Your organization may be invited to discuss the results, provide context, and clarify next steps.

4

Support Alignment

Training, TA, coaching, or assessment opportunities are recommended based on your organization's current needs and readiness.

5

Progress Over Time

Quality information is revisited as your organization completes supports and strengthens practice.

Answer honestly and based on current practice

The survey is designed to support growth, not compliance. Accurate responses help BOOST recommend supports that are relevant and manageable for your organization.
